

Testimonial Legends Development – Experience within the FiveM community

By Legend Development - Summary of a lived experience

LEGENDS DEVELOPMENT – OFFICIAL STATEMENT ON THE QUASAR / DISCRIMINATION SITUATION

Hello, My name is Boris, founder of Legends Development.

Together with my partner Boris, we built one of the largest whitelist roleplay servers in Bulgaria. After years of experience managing communities, partnerships, and operations, we made the decision to shut down the server and focus entirely on Legends Development a Tebex store created to support small servers, creators, and the broader FiveM community.

From the beginning, our goal has been simple:

Deliver real value.

We released high-quality resources for free to prove that not every creator is here just for money. This helped us grow to over 2,500 Discord members and build multiple partnerships, including one with Quasar.

WHAT HAPPENED

We were approached by a third-party giveaway service (Start Giveaway Hub), operated by an individual known as “Kody”.

The experience included:

- Inconsistent and unclear pricing,
- Multiple different offers over time,
- Continuous pressure for ongoing collaboration,
- Requests to reconsider our existing partnerships, specifically Quasar,

Despite this, we agreed to run one paid giveaway as a test.

During the entire process:

- Our partnership with Quasar was fully transparent,
- No issues were raised before or during the giveaway,
- The giveaway was completed successfully,

THE ISSUE

After we declined further services:

- We were repeatedly pressured to remove our partnership with Quasar,
- We were told future cooperation depended on this decision,

- Shortly after, multiple partners cut ties with us, citing our Quasar affiliation,

This leads to a serious concern:

We are being penalized and effectively blacklisted not for our own actions, but for a third-party association

SELECTIVE ENFORCEMENT – T7 CASE

To better understand the situation, we conducted a direct test.

We reported T7

Development with clear and documented evidence, including:

- Direct statements admitting the use of content taken from another server,
- Claims that the original work was rewritten using AI,
- Supporting proof and timestamps,

This behavior directly conflicts with Tebex Terms of Service.

Despite this:

- The evidence was reviewed,
- The creator remains active,
- No blacklist or action was applied,

This creates a clear inconsistency:

Verified cases of potential rule violations are ignored, while we are penalized for a partnership that does not violate any rules.

OUR POSITION

We want to be clear:

- Legends Development has not violated any Tebex or CFX policies,
- We do not engage in stolen content, scams, or unethical practices,
- Our partnership with Quasar is strictly business-related (ads, exposure, giveaways),

No creator or business should be discriminated against based on associations without official rulings from legitimate authorities like Tebex or CFX.

CONCERNS

We are seeing:

- Lack of transparency in blacklist decisions,
- No clear authority behind enforcement,
- Unequal treatment between creators,

- Pressure-based decisions instead of rule-based systems,

This creates an environment where unofficial groups can impact reputations and business outcomes without accountability.

OUR VALUES

Legends Development stands for:

- Fairness,
- Transparency,
- Equal opportunity,
- Supporting smaller creators,

We do not support:

- Gatekeeping,
- Forced decisions,
- Community division,

FINAL MESSAGE

We will continue to:

- Support the community,
- Deliver high-quality resources,
- Build partnerships based on respect, not pressure,

We will not be forced into decisions that go against our principles.

If you are part of this community:

Think critically.

Ask for evidence.

Make decisions based on facts, not pressure.

Boris(Jabata) & Boris
